Ideal for

- Office environments
- Classrooms
- Manufacturing floors
- Warehouses
- Other common area

PRODUCT SUMMARY

Compact 3Com® 3101 and 3101SP Basic Phones combine excellent call handling functionality with simple operation for business users that need basic, affordable communications on their desktops. Sharp acoustics and ergonomics-inspired design encourage collaboration and help increase productivity.

The 3101SP Basic Phone with Speaker delivers high-quality audio with a half-duplex, two-way speakerphone for convenient hands-free telephony services. The 3101 Basic Phone is identical to the 3101SP model, but offers a listen-only speaker. Both models provide quick access to frequently used functions. Three softkeys and a cursor-controlled, two-line display enable instant, intuitive directory and call log access. A large message-waiting lamp and clearly marked Hold and Message buttons offer enhanced visibility and workflow.

Self-locating capabilities save time and service-call expenses, lowering total cost of ownership. Moving a phone involves simply plugging it into a network port at a new location. All personal settings, directory entries, and voice mail travels with the phone.

Browser-based management eases configuration tasks, and web-based support makes advanced features easier to master. What's more, customization capabilities let users do many set-up procedures themselves.
